

CAD/CAM on the NHS at Standard Prices

After the long build up we are finally ready to launch CAD/CAM on the NHS. As far as we are aware we will be doing something unique by providing CAD/CAM restorations on the NHS. This is even more of an achievement as, after thorough testing, we are doing so at our standard prices! This will allow you to provide your patients the highest quality materials and restorations at no extra cost!!!

Best Materials - Standard Prices

There is now no reason to compromise as we are able to provide NHS CAD/CAM work from single crowns and inlays all the way to full arch restorations all

using the best materials available at standard prices. All you need do is request CAD/CAM on the prescription form / lab ticket, which has been made easier with our new style forms, to provide your patients with the highest quality restorations. The only small compromise is we need an extra day in the laboratory, but as we generally offer a fast service this still means we work more quickly than most labs.

CAD/CAM on the NHS Now

We will be expanding on this news in the coming months but CAD/CAM on the NHS is available now and some of the main benefits are listed below. Please let us know if you would like more information or just start ticking the CAD/CAM box and start providing the very best for your patients.

Proposed CPD Verifiable Seminar

As a company that likes to innovate to provide the highest level of service and value to our customers we are looking at the possibility of organising a seminar early next year and would like to see how many would be interested in attending such a seminar.

Ashley Latter

The speaker we are looking to provide is Ashley Latter. He has worked with many surgeries helping them to ethically increase their turnover and revolutionise their practices and has a string of success stories. This will be a first for Ashley as he has not worked with many, if any, Midlands based surgeries. In conjunction with Ashley we will also be looking to

have at least one major supplier to demonstrate their latest innovations and products, possibly with a hands-on element.

Indicate your Interest

As mentioned this will be CPD verifiable and open to the whole dental team. There may be a small cost to attend but if so there will be something in place that will more than cover any booking fee. Due to the cost and work involved in doing something on this scale we would be grateful if you would indicate your interest by completing the form overleaf and returning it to us. Alternatively, you can e-mail your interest to info@mauricehood.co.uk or complete the form on our website

at mauricehood.co.uk/downloads. This will be a unique opportunity for the Midlands so hopefully there is enough enthusiasm to allow us to stage this event.

7 Reasons to use CAD/CAM

Some of the benefits of CAD/CAM restorations include:

- Accuracy of fit
- Better quality of materials
- Extensive application range
- Improvement in precision and planning
- Reduced surgery time
- Guaranteed no nickel or beryllium
- Clinical long-term reliability

Full Contour Zirconia Crowns

.....With a Five Year Warranty

In a busy month of news we are also bringing you an alternative to full metal crowns. We can now provide full contour Zirconia crowns. These crowns are ideal for the posterior region as they are very strong but also highly biocompatible. The body loves Zirconia.

The Aesthetic Option

They are very aesthetic compared to full metal and even some bonded work. There is minimal porcelain build up so they are generally not

suitable to very aesthetic regions, such as anteriorly, but in virtually every other way they are far superior to most other restorations in the posterior region and in most instances cheaper!

Versatile

Not only this but they are also very versatile. They can be used for single crowns up to full arch bridges. We can provide a bridge that has full contour crowns posteriorly with the anterior units having a porcelain build up to maximise aesthetics. We are also going to start testing inlays and onlays for further added flexibility.

More Biocompatible and Cheaper

The best has been saved until last because due to the reduced amount

...ONLY £89!!!

of laboratory working time required the cost per unit is only £89. So you can have a restoration that is generally cheaper than a gold crown that is also more aesthetic and biocompatible, why choose anything else?

We would be interested in attending an Ashley Latter, CPD Verifiable, Seminar to be held early 2013.

Go Green – Have your Invoices and Statements E-Mailed

We are in the process of updating our systems to allow invoices and statements to be e-mailed. This will be our preferred option as another way of reducing our carbon footprint. If you would like to receive your invoices and statements via e-mail please let us know and as soon as the system is up and running we will set this up as your preferred method.
